

Bird Watching Package

For those of you who like to watch birds, we have something for everyone. For lifers (those folks making a lifelong bird list), we have a healthy population of Dusky (Blue) Grouse on the ranch, Great Grey Owls nesting a few miles away, periodic Rock Wrens right outside of camp, and Mountain Plovers just a couple of hours away for those who are up for a day trip (additional charge for day trips off of the Reserve).

Screech Owl Chick

Perhaps you're more interested in life histories. Well, we have a variety of nest boxes where we monitor Mountain Bluebirds, Swallows, and House Wrens – even Kestrels and Saw Whet owls (we're currently working on a camera in a nest box so we can watch what's going on inside from a computer screen in the dining hall).

Dusky Grouse

And for those of you who just like to watch them, we have numerous bird species using our feeders, nesting

in bird houses, and bathing in our ponds and bird baths right off the porch of your cabin.

Siskins and Crossbill

Some of them really do get absurdly used to us!
